

# Postgraduate Sport and Exercise Sciences courses

---

We are one of the leading sports science departments in the world. Our taught and research-based postgraduate programmes cover a wide range of areas from exercise science to sport coaching and allow you to develop and apply knowledge in the sciences of sport, exercise and health. Join our passionate and diverse community where together we are finding new ways to support the physical activity, wellbeing and sport needs of all individuals ranging from elite athletes to sedentary adults. You will learn from leading experts in their fields and will have access to excellent sporting and research facilities including our £55 million sports centre and custom-built sport, exercise and rehabilitation sciences facility. Our collaborative approach means you will benefit from partnerships with professional sporting bodies as well as other areas of the University such as the Medical School and University of Birmingham Sport.

## Integrated PhD in Life Sciences Doctoral Training Programme (iDTP)

The iDTP combines PhD research with a programme of structured research, professional and subject-specific training.

---
