

Postgraduate Psychology courses

If you are curious about mind, brain and behaviour explore our range of postgraduate taught or research programmes. From youth mental health and developmental science to brain imaging and cognitive neuroscience our postgraduate portfolio is designed to provide you with fundamental knowledge and develop your skills in scientific psychological research. Furthermore, you will be part of a world-class community of leading-edge psychological research. Our Centre for Applied Psychology brings together forensic, clinical and research psychologists supporting a broad range of teaching programmes and research projects. We offer taught and research programmes across forensic, clinical, forensic clinical psychology, psychological practice, Cognitive Behaviour Therapy (CBT) and Compassion Focused Therapy (CFT).

Integrated PhD in Life Sciences Doctoral Training Programme (iDTP)

The iDTP combines PhD research with a programme of structured research, professional and subject-specific training.
